Rate Schedules	5.0

TERMS OF PAYMENT

APPLICATION OF LATE PAYMENT SERVICE CHARGE

The schedule of late payment service on all unpaid accounts (approximately twenty-two days after the first bill) as they become in arrears is as follows:

<u>Arrears</u>	<u>Service Charge</u>
\$25.00 and Above	\$ 5.00 or 1.5%, Whichever is Greater

APPLICATION OF DELINQUENT ACCOUNT CHARGE

Delinquent account charges may be waived by a Customer Service Representative provided: (1) the customer has had no delinquent adjustment in the preceding twelve months or (2) the delinquent charge was erroneously applied.

RETURNED CHECKS

If the customer pays the returned check before the check is received from the bank, the fee is \$20.00.

If the check has already been received from the bank, the fee is \$35.00.

SECURITY DEPOSIT: A security deposit is required for providing services furnished is as follows:

RESIDENTIAL AND GENERAL SERVICES

1. Existing Accounts

No change in deposit of existing accounts unless service is discontinued for non-payment. If an account is cut-out for non-pay an additional deposit in the amount equal to the deficiency between the present deposit and the deposit amount prescribed by this policy for a new service of similar type will be required prior to reconnection.

2. Deposits for New Accounts

The deposit for new accounts shall be as follows:

A. Residential Accounts

For customers on Residential Electric Service, the minimum deposit shall be \$75.00 and the maximum deposit shall be \$240.00.

B. General Service Accounts

For customers on General Service rate the required deposit shall be two times the average monthly bill as estimated by the Utilities Commission. In the event the Utilities Commission determines that the deposit is not sufficient to cover twice the actual average monthly bill an adjustment to the required deposit may be made. In any event the minimum deposit for all General Service Accounts shall be \$75.00.

3. Deposit Payment

Residential Accounts

The customer will be billed for the deposit(s) and will have ten (10) days to pay said deposit(s). If the customer does not pay the deposit(s) within the ten (10) day period, utility services will automatically be disconnected.

Deposits must be made by cash, check, money order, or Utilities Commission approved aid voucher.

The following guidelines apply to all customers requesting residential electric services:

(Continued on Original Sheet No. 4.1.1)

(Continued from First Revised Sheet No. 4.1)

- A. For existing accounts with good credit standing with the Utilities Commission at the time of adoption of this policy, their existing deposits will remain unchanged. Discontinuance of service for non-payment on existing accounts may require an additional deposit.
- B. Any new customer establishing services with the Utilities Commission will have their social security number verified by the “On-Line Utility Exchange” or any other provider of similar services. Based on the results, the customer may or may not be required to pay a deposit.
- C. Any current or returning customer, with at least six months of history with the Utilities Commission, requesting new service will have their deposit based on current/previous account history. Customers with no more than two late fees, no disconnections for non-payment, and no returned checks, all within the most recent 24-month period, will not be required to pay a deposit. Any returning customers not meeting these criteria will be required to pay a maximum deposit.
- D. Any customer requesting service that has a paid write-off (final bill balance sent to collections) with the Utilities Commission will be required to pay the maximum deposit prior to connection of service. If the customer has an unpaid write-off with the Utilities Commission, they will be required to pay it in full, along with the maximum deposit prior to connection of service.
- E. The Utilities Commission will not transfer a deposit from one individual to another individual. Transfers of deposit(s) from one address to another address for the same individual will be made provided the account balance at the currently served location is in a current (outstanding balance is zero) status.
- F. If a customer transfers his deposit to an account within the system, the final bill on the old account, if delinquent, will be transferred to the current account for collection and becomes subject to collections and disconnect procedures.
- G. Customers that are continuously delinquent are subject to an increase/update to their deposit amount.
- H. Residential Blanket Deposit
Blanket deposits will be accepted from residential customers with an average of ten or more active, long term accounts – open simultaneously. Long term defined as active for a minimum of two complete billing periods. Deposits will be held on a master account, thereby eliminating the need to place a deposit for each individual service address.

The initial calculation of the blanket deposit will be based on credit history and number of accounts provided. Blanket deposits may be evaluated and recalculated as necessary based on the number of active accounts and/or credit history.

(Continued on Original Sheet No 4.1.2)

(Continued from Original Sheet No. 4.1.1)

Blanket deposit payments may be made by cash, check, money order, or a credit card payment of up to \$1,000 or by a surety bond for the full amount required, or by an irrevocable letter of credit satisfactory to the Utilities Commission for the full amount required. The customer will need to pay the blanket deposit immediately at the time a blanket deposit is being requested. (Note – Only individual account residential deposits will be billed with a 10-day allowance for payment).

In the event the deposit is paid by surety bond or an irrevocable letter of credit, and the instrument matures, the Utilities Commission reserves the right to request cash (legal tender) for the required deposit. Failure to comply with this requirement will result in discontinuance of service.

General Service (Commercial) Accounts

- A. The customer must pay the full deposit at the time the account is being established.
- B. Deposit payments must be made by cash, check, or money order. Credit card payments will be accepted for payments of \$1,000 or less.
- C. When the required combined total deposit exceeds \$1,000, the applicant, at their option, may furnish in lieu of cash the following instruments:
 1. A surety bond for the full amount required.
 - OR
 2. An irrevocable letter of credit satisfactory to the Utilities Commission for the full amount required.

In the event the above instruments mature, the Utilities Commission reserves the right to request cash (legal tender) for the required deposit. Failure to comply with this requirement will result in discontinuance of service.

- D. For new accounts, the Utilities Commission will initiate a review of customer's monthly billings as compared to the deposit paid, not less than six months but not more than one year from the service date.

4. Additional Deposits Requirements

In the event the utility service is discontinued for non-payment or has received two (2) or more returned checks within a twelve (12) month period, the Utilities Commission may require a deposit(s) sufficient to cover at least two (2) months of the previous average monthly billing to be paid within ten (10) days from notice. If such additional deposit is not made within ten (10) days, the Utilities Commission may disconnect service in accordance with the collection and disconnect policy. On a case by case basis, an extended due date for additional deposits may be considered.

(Continued on Original Sheet No. 4.1.3)

(Continued from Original Sheet No. 4.1.2)

5. Interest Rates

Interest at a rate to be determined by the Utilities Commission each year and will be credited to the customer's account each month beginning with the first full month of service.

6. Refunds of Deposit

For residential accounts only, the Utilities Commission will promptly and automatically credit the deposit to the customer's account after adoption date of the policy when:

- A. The customer had paid bills for the previous twenty-four (24) consecutive residential billings without having service disconnected for non-payment;
AND
- B. Without having more than two (2) occasions on which a bill was delinquent for the previous twenty-four (24) months;
AND
- C. When a customer has not had any returned checks within a twenty-four (24) month period (excludes verified bank errors).

The deposits are refundable only to the customer whose name appears on the account at time of refund.

RATE SCHEDULE SF-1
SERVICE FEES RATE SCHEDULE

The Utilities Commission shall charge and collect for customer service fees based on the type of service rendered.

Availability

This schedule is available at any location within the Utilities Commission service area in accordance with the service policies of the Commission.

Terms of Payment

Payment for services rendered shall be made at the time the service is requested.

Fees

The fees to be charged for services rendered are as follows:

<u>SERVICE</u>	<u>FEES</u>
<hr/>	
<u>Cut-In Fees</u>	
Service Requests will only be performed during regular working hours Requests received for cut ins by 2:00 p.m. M-F will be completed on the same day, requests received after 2:00 p.m. will be completed no later than 2:00 p.m. the following business day.	\$ 35.00
Service Request Fee After Hours – Emergency Only – Determined by the UC	\$150.00
Meter Lock Charge* (*Required for meter sets for construction or as may be determined needed by the UC)	\$ 35.00
Temporary Cut-In/Cut-Out Service for Building Maintenance, Etc. (Weekdays) (Requires 24 hrs. Notice; Services will be active from 11:00 a.m. the day of cut-in to 11:00 a.m. the next day.)	\$ 75.00
Temporary Cut-In/Cut-Out Service for Building Maintenance, Etc. (Weekends) (Requires 24 hrs. Notice; Services will be active from 11:00 a.m. on Friday to 11:00 a.m. on Monday.)	\$100.00
<hr/>	
<u>SERVICE</u>	<u>FEES</u>
Reconnection Fee After Disconnection for Non-Payment, Regular Working Hours	\$ 50.00
Reconnection Fee After Unauthorized (Illegal) Connection* (*Minimum or Actual Cost of Investigation)	\$150.00
Reconnection at Pole	\$150.00
Meter Reset Charge After Unauthorized (Illegal) Connection (Same as Supplemental Meter)	\$150.00

<u>SERVICE</u>	<u>FEES</u>
<u>TAMPERING FEES*</u>	
Cut Seal or Cut Lock Fee	\$ 35.00
Damaged Equipment	\$ 75.00
Meter Tampering / Unauthorized Use (Illegal) Fee* - 1 st Offense (*Minimum Plus Any Applicable Service Charges)	\$300.00
Meter Tampering / Unauthorized Use (Illegal) Fee* - Repeat Occurrence (*Minimum Plus Any Applicable Service Charges)	\$500.00

*Utility Tampering and/or Unauthorized Use (Illegal) Fees will be assessed whenever there is evidence of meter tampering, meter bypassing, or self-restored services. In addition to the cost of investigation, repairs, the estimated usage, and other applicable service charges, up to and including three times the estimated dollar value of the services obtained unlawfully.

Trip Fees: Any time a utility employee is deployed (other than routine meter readings or maintenance) to a customer's premise, whether for the process of disconnection (hang tag or disconnect) or other services, the customer will bear the expense. Utilities Commission field personnel are not authorized to take payment in the field. Residential energy audits are exempt from trip fees.

Trip Fees During Regular Working Hours	\$ 35.00
Trip Fees After Hours – Emergency Only* (*Determined by the UC)	\$150.00
<u>Research Fee:</u> Per Each Request for Determination of Existing U.C. Liens, Assessments and/or Promissory Notes	\$ 20.00
<u>Collections Processing Fee:</u> Customer's Utility Account Sent to Collections for Non-Payment – Fee is Per Account	\$ 35.00

ELECTRIC POLE LINE EXTENSIONS OR ADDITIONS

APPLICATIONS

Upon acceptance of the application for service in the Utilities Commission service territory, the Utilities Commission will proceed to do such work including providing and installing required equipment necessary in order to render service.

In general, where the major portion of an anticipated extension will be built on public rights-of-way, and the new customer can reasonably be characterized as permanent, then the Utilities Commission will do all necessary construction at no cost to the customer.

Where these guidelines clearly do not apply, the Utilities Commission may charge the customer all costs in excess of 2-1/2 times the estimated annual non-fuel revenue (exclusive of the costs for transformers, secondary connections, and meters), and/or such other charges as the particular circumstance may dictate. When kW demand factors, intermittent usage patterns, or premature investment result in necessarily inefficient utilization of the Utilities Commission's facilities, the Utilities Commission may require cash advances, minimum guarantees, or other means of providing a fair return on investment.

The terms and charges will be determined by the Utilities Commission staff based on the above conditions.

REQUIREMENTS AND POLICY
FOR
RESIDENTIAL UNDERGROUND SERVICE LATERALS

UTILITIES COMMISSION

The Utilities Commission will own and maintain service laterals up to the designated point of delivery except as otherwise noted. The Utilities Commission will install one underground service lateral to all newly constructed residential buildings containing less than five separate dwelling units. All units in one building must be gang metered at a single designated location.

CUSTOMER REQUIREMENTS

The customer shall furnish and install conduit as specified by the Utilities Commission. This includes excavating trench and backfill. The customer shall pay the Utilities Commission the differential cost between an overhead service and an underground service lateral as follows:

Three Phase Service:	\$375.00*
Single Phase Service:	\$350.00*

*These costs are for the average base electric service including 50' service lateral installed. Additional costs will be added and specific costs estimates provided for larger electric services, additional lengths of lateral, and if the work is performed at the request of the customer on a Saturday or Sunday/Holiday.

The relocation and/or upgrading of existing overhead and underground residential service laterals shall be the same as specified above plus all costs for labor, equipment, and material.

Existing direct buried service laterals that fail will be repaired up to two (2) times. After the second repair, the Utilities Commission will evaluate and install conduit and new service cable to match the existing direct-buried service size or install per current Utilities Commission standards at no cost to customer. In order to do so, the customer shall provide an easement for the new facilities (as necessary) and will allow the Utilities Commission access to their property to install the new facilities to the existing meter base location. Any request for upgraded services will be evaluated by the Utilities Commission and charged appropriately.

UNDERGROUND ELECTRIC PRIMARY DISTRIBUTION

DEFINITIONS

- A. Residential Subdivisions: a tract of land divided into five or more building lots, and zoned residential.
- B. Single Family Detached Unit: a house designed and built to accommodate one family. The unit shall be free standing, not attached to any other dwelling unit.
- C. Multi-Family Residential Building: a structure in which two (2) or more dwelling units are attached by a common wall and/or roof.

APPLICATION

- A. Single Family Detached Unit: underground primary distribution facilities will not be provided unless the units are a part of a residential subdivision.
- B. Multi-Family Residential Building: will have underground primary distribution facilities provided so long as:
 - 1. The Utilities Commission is free to construct such extensions in the most economical manner.
 - 2. Reasonably full use is made of the tract plan upon which the building will be constructed.
 - 3. The applicant provides the necessary conduit furnished and installed, at his expense, as specified by the Utilities Commission.
 - 4. If any feeder circuit mains are deemed necessary by the Utilities Commission to provide and/or maintain adequate service within the development or buildings, and if the feeder mains are required to be underground, the underground feeder mains shall be installed by the Utilities Commission at no additional cost to the applicant.

(Continued on First Revised Sheet No. 4.5.3)

(Continued from First Revised Sheet No. 4.5.2)

- C. Residential Subdivisions and Commercial Customers: Underground primary distribution facilities will be provided to residential subdivisions and commercial customers when requested by the applicant subject to the following conditions:
1. The Applicant, at their expense, will furnish and install conduit as specified by the Utilities Commission. This includes excavating, trench and backfill.
 2. If any feeder circuit mains are deemed necessary by the Utilities Commission to provide and/or maintain adequate service within the development or buildings, the feeder mains shall be installed by the Utilities Commission at no additional charge to the applicant.
- D. Other: All other units or buildings not explicitly covered by any of the above, apply for installation of underground primary distribution facilities; however, any differential cost between above ground (overhead) primary distribution construction and underground primary distribution construction will be borne completely by the applicant.

INDEX OF RATES
Schedules

Schedule	Description	Sheet No.
GS-4	General Service – Non-Demand	5.0

RATE SCHEDULE GS-4

GENERAL SERVICE - NON-DEMAND ELECTRIC RATE SCHEDULE

The Utilities Commission shall charge and collect for general service electric energy on the basis of availability, application, type of service, monthly rate, minimum charge, tax adjustment clause and fuel and purchased power cost adjustment clause.

AVAILABILITY

This schedule is available at any location within the Utilities Commission service area in accordance with the service policies of the Commission for non-residential customers with an annual measured peak demand of less than 50 kW.

APPLICATION

To non-residential customers for all electric power and energy requirements. Each premises will be supplied at one point of delivery and all electric service will be supplied through one meter.

TYPE OF SERVICE

Single or three phase, 60 Hertz, at one of the Commission's standard service voltages.

MONTHLY RATE

Customer Charge:

Single Phase Service	\$9.75
Three Phase Service	\$14.26

Energy Charge:

All kWh per month at 9.377¢ per kWh

The minimum charge is the Customer Charge.

FUEL AND PURCHASED POWER COST ADJUSTMENT CLAUSE

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

TERMS OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

RATE SCHEDULE RS-4

RESIDENTIAL SERVICE ELECTRIC RATE SCHEDULE

The Utilities Commission shall charge and collect for residential electric service energy based on the availability, application, type of service, monthly rate, fuel and purchased power cost adjustment clause and tax adjustment clause.

AVAILABILITY

This schedule is available at any location within the Utilities Commission service area in accordance with the service policies of the Commission.

APPLICATION

To residential customers in single family dwelling units when all electric service supplied to the dwelling unit is used for household purposes and is measured through one meter. Any portion of the electric service supplied to a dwelling unit used for non-residential purposes, must be wired by the customer, and metered separately as a non-residential meter. In the case of multiple meters, this rate schedule is applicable to the portion used for residential purposes.

TYPE OF SERVICE

Single phase, 60 Hertz, 120/240 volts. Three phase service may be furnished if available at the discretion of the Commission.

MONTHLY RATE

Customer Charge

Single Phase Service	\$8.25
Three Phase Service	\$11.46

Energy Charge

First 1,000 kWh per month at 9.016¢ per kWh
All kWh over 1,000 kWh per month at 10.570¢ per kWh

The minimum charge is the Customer Charge.

FUEL AND PURCHASED POWER COST ADJUSTMENT CLAUSE

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

(Continued on Twelfth Revised Sheet No. 6.1)

(Continued from Twelfth Revised Sheet No. 6.0)

TERMS OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

RATE SCHEUDLE SL-3

PUBLIC STREET LIGHTING AND PRIVATE OUTDOOR LIGHTING ELECTRIC SERVICE RATE SCHEDULE

The Utilities Commission shall charge and collect for residential electric service energy based on the availability, application, type of service, monthly rate, fuel and purchased power cost adjustment clause and tax adjustment clause.

AVAILABILITY

This schedule is available throughout the entire territory served by the Utilities Commission, City of New Smyrna Beach, Florida. Availability may be limited due to inaccessibility by Utilities Commission equipment and personnel.

TYPE OF SERVICE

Service includes installation, lamp replacement, maintenance, and removal. The Utilities Commission will maintain its facilities during regular working hours but does not guarantee continuous lighting and will not be liable for damages for any interruption, deficiency or failure of service, and reserves the right to interrupt service at any time for necessary repair to lines and equipment or system protection. The Utilities Commission shall be permitted to enter the customer's property at reasonable times for the purpose of inspecting, maintaining, installing and removing any of its equipment and facilities. The Utilities Commission will not be liable for damages occurring during installation, maintenance, or removal. The customer will be responsible for tree trimming and removing other vegetation that obstructs Utilities Commission vehicles and personnel. Willful damage to any Utilities Commission owned facilities by the customer will require full restitution by the customer.

TYPE OF INSTALLATION

Streetlights will normally be installed on Utilities Commission existing distribution system poles and fed from existing wires. The installation of any new distribution facilities and/or alterations to existing facilities to serve new streetlights will require a Contribution-in-Aid-of-Construction (CIAC) paid in advance.

Streetlights installed in existing or planned underground distribution areas will require customer trenching and conduit installation according to Utilities Commission drawings and specifications. The customer will also install Utilities Commission supplied equipment necessary to complete the conduit system. The Utilities Commission will install the electrical system, streetlight poles and fixtures. A Contribution-in-Aid-of-Construction (CIAC) paid in advance will be required.

CUSTOMER CONTRIBUTIONS

Contribution-in-Aid-of-Construction (CIAC) - The installation cost of any new distribution system and/or alterations to existing facilities to serve streetlights will require a CIAC payment from the requesting customer equal to the total Utilities Commission cost paid in advance.

FUEL AND PURCHASED POWER COST ADJUSTMENT CLAUSE

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission’s Fuel and Purchased Power Cost Adjustment Clause which is a part of the “Monthly Rate” of this rate schedule. The Monthly Fuel and Purchased Power Cost Adjustment charges, if any, will be determined as follows:

$$\text{Daily kWh usage} \times \text{days in billing period} \times \text{monthly energy cost adjustment factor (expressed dollars per kWh)}$$

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

TERMS OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

FUEL AND PURCHASED POWER COST ADJUSTMENT CLAUSE

APPLICATION

This fuel and purchased power cost adjustment clause is applicable to and becomes a part of all the Utilities Commission's retail rate schedules and is applicable to all sales thereunder.

BILLING

The monthly bill computed under the appropriate retail rate schedule will be increased or decreased by an amount equal to the result of multiplying the kWh used by the fuel and purchased power cost adjustment factor (FPPCAC) determined as follows:

$$FPPCAC = \left(\frac{Fm}{Sm} - 0.05056\right) \times \frac{1}{1-L} \times \frac{1}{1-T}$$

Where:

1. FPPCAC = Adjustment factor in dollars per kWh rounded to the nearest one thousandth of a cent applicable to bills rendered during the current fiscal billing cycle defined as October through September.
2. Fm = Total applicable fuel and net interchange energy costs.

Total Applicable Fuel Cost is:

- (a) Fossil and nuclear fuel consumed in the Utilities Commission's generating units and the Utilities Commission's share of fossil and nuclear fuel consumed in jointly owned generating units, plus the annual amortization requirement associated with the disposal of spent nuclear fuel as estimated for the current billing cycle; plus,
- (b) The net cost of purchases for scheduled maintenance, and the net energy and transmission costs of energy purchases when such energy is purchased on an economic dispatch basis to substitute for the Utilities Commission's own higher cost of energy estimated for the current billing cycle; plus,
- (c) The fossil and nuclear power costs associated with purchases for reasons other than identified in (b) above, including the purchase of capacity and energy owned through participation in joint agency projects and firm interchange service, and any associated transmission costs estimated for the current billing cycle; plus
- (d) Any one-time, non-recurring expenditures incurred by the Utilities Commission for the purpose of obtaining cost reductions on energy or capacity; minus

(Continued on Twelfth Revised Sheet No. 8.1)

(Continued from Twelfth Revised Sheet No. 8.0)

- (e) The energy costs of fossil and nuclear fueled generation recovered through the inter-system sales including the fuel costs related to the economy energy sales and other energy sold on an economic dispatch basis estimated for the current billing cycle; plus
 - (f) An amount to correct for the over-recovery or under-recovery of the actual applicable fuel costs as defined in (a), (b), (c), (d) and (e) above, during the latest fiscal year, determined as the difference between actual applicable fuel costs and the costs actually billed during the same period; plus any previous over-recovery or under-recovery of actual applicable fuel costs as defined above associated with prior period adjustments that allows for a reserve balance of FPPCAC funds as established by the Utilities Commission, if any; minus
 - (g) At the sole discretion of the Utilities Commission, the amount of any refunds associated with fuel and purchased power expenses as defined in (a) through (c) above, net of litigation expenses and other related costs, if any.
3. S_m = kWh estimated corresponding to the current 12-month billing cycle and is equal to the estimated sum of net generation, purchases, and interchange in, less inter-system sales.
4. L = System losses to be adjusted at the beginning of each fiscal year, based on the actual prior 12-month losses ending August 31.
5. T = Mandatory payment to the City of New Smyrna Beach, Florida, equal to 6%

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

SPECIAL PROVISIONS

The FPPCAC may be modified during a 12-month billing cycle if significant circumstances arise which warrant such change, and if approved by the Utilities Commission.

RATE SCHEUDLE GSD-3

GENERAL SERVICE - DEMAND ELECTRIC RATE SCHEDULE

The Utilities Commission shall charge and collect for general service demand electric energy on the basis of availability, application, type of service, monthly rate, minimum charge, determination of billing demand, power factor adjustment, primary service discount, tax adjustment clause and fuel and purchased power cost adjustment clause.

AVAILABILITY

At any location within the Utilities Commission, City of New Smyrna Beach, Florida, service area in accordance with Commission policies to non-residential customers with an annual measured peak of 50 kW up to 250 kW.

APPLICATON

Non-residential customers for all electric power and energy requirements. Each premises will be supplied one point of delivery and all electric service will be supplied through one meter.

TYPE OF SERVICE

Single or three phase, 60 hertz, at one of the Commission's standard service voltages.

MONTHLY RATE

Customer Charge	\$33.50
Demand Charge	\$ 8.00 per kW of billing demand
Energy Charge	7.666¢ per kWh

The minimum charge is the Customer Charge plus the Demand Charge.

DETERMINATION OF BILLING DEMAND

The Billing Demand shall be the greater of: (1) the Measured Demand, for the current month, adjusted for power factor, if applicable; (2) fifty (50) kW; and (3) eighty (80) percent of the maximum Measured Demand, power factor adjusted, recorded during the preceding eleven (11) months.

(Continued on Tenth Revised Sheet No. 11.1)

(Continued from Tenth Revised Sheet No. 11.0)

POWER FACTOR ADJUSTMENT

The Utilities Commission may, at its option, install metering equipment to allow the determination of the reactive components of power utilized by the customer. The customer's utilization of equipment shall not result in a power factor at one point of delivery of less than 85 percent lagging at the time of Measured Demand. Should the power factor be less than 85 percent lagging during any month, the Utilities Commission may adjust the Measured Demand by 85 percent and by dividing the result by the power factor actually established at the time of the Measured Demand during the current month. Such adjusted Measured Demand shall be used in determining the Billing Demand.

FUEL AND PURCHASE POWER COST ADJUSTMENT

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

TERM OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

RATE SCHEDULE RSL-2

RESIDENTIAL LOAD MANAGEMENT SERVICE ELECTRIC RATE SCHEDULE

The Utilities Commission shall credit, charge, and collect for load management residential electric service energy based on the availability, application, maximum monthly load management credits, conditions of interruption, peak period, special provisions, tax adjustment clause and terms of payment.

AVAILABILITY

At any location within the Utilities Commission service area in accordance with the special provisions set forth on Sheet I6.1.

APPLICATION

To customers meeting the application requirements for Residential Service. Load Management credits under this schedule are applicable to residential customers using any combination of the following equipment.

1. Electric water heater
2. Electric central heating system
3. Electric central cooling system

MAXIMUM MONTHLY LOAD MANAGEMENT CREDITS

<u>Interruptible Equipment</u>	Maximum Monthly Credit <u>(500 kWh)</u>	Monthly Credit <u>(Below 500 kWh)</u>
Water Heater	\$3.00	\$.006 x kWh
Central Heating System	\$2.25	\$.0045 x kWh
Central Cooling System	\$2.25	\$.0045 x kWh

The Maximum Monthly Load Management Credit is based on electric consumption of 500 kWh. For any month in which the consumption falls below this level, the Load Management Credit will be adjusted according to the above formulas.

CONDITIONS OF INTERRUPTION

The Commission may interrupt electric service to the above equipment, during the Peak Period, with a frequency and duration designed to minimize both the system peak demand and any inconvenience to load management customers. The current interruption policy, subject to change, may be obtained from the Commission.

PEAK PERIOD

For the months of November through April, the Peak Period is the prevailing clock time between 6:00 A.M. and 11:00 A.M. and 6:00 P.M. and 11:00 P.M.

For the months of May through October, the Peak Period is the prevailing clock time between 12:00 noon and 11:00 P.M.

(Continued on Forth Revised sheet No. 16.1)

(Continued from Forth Revised Sheet No. 16.0)

SPECIAL PROVISIONS

1. The Utilities Commission shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test, and remove load management devices on the electrical equipment specified above.
2. Prior to the installation of load management devices, the Utilities Commission may inspect the customer's electrical equipment to ensure good repair and working condition but the Utilities Commission shall not be responsible for the repair or maintenance of the electrical equipment.
3. The Utilities Commission shall not be required to install load management devices on electrical equipment which would not be economically justified for reasons such as excessive installation costs, oversized heating or cooling equipment, abnormal utilization of equipment, including vacation or other limited occupancy residences, or in residences utilizing less than 500 kWh per month.
4. Multiple units of any electrical equipment specified above must all be installed with load management devices to quality for the credit attributable to that equipment.
5. Billing under this rate schedule will commence with the first complete billing period following installation of the load management device. A customer may change the selection of electrical equipment installed with load management devices or transfer to another rate schedule by notifying the Utilities Commission 45 days in advance.
6. The limitations on equipment interruptions shall not apply during capacity emergencies on the Utilities Commission's system.
7. If the Utilities Commission determines that the load management devices have been tampered with, the Utilities Commission may discontinue service under this rate schedule and bill for all prior load management credits received by the customer, unless an earlier tampering date can be established, plus applicable investigative charges.
8. If the Utilities Commission determines that the impact of equipment interruptions have been offset by the customer's use of supplementary or alternative electrical equipment, service under this rate schedule may be discontinued and the customer billed for all prior load management credits received over a period not to exceed six months.

(Continued on Forth Revised Sheet No. 16.2)

(Continued from Forth Revised Sheet No. 16.1)

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

TERMS OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

RATE SCHEDULE TS-1

TEMPORARY SERVICE ELECTRIC RATE SCHEDULE

The Utilities Commission shall charge and collect for temporary service electric energy on the following basis of availability, application, type of service, monthly rate, and special provisions.

AVAILABILITY

This schedule is available throughout the entire territory served by the Utilities Commission, City of New Smyrna Beach, Florida.

APPLICATION

This schedule is applicable to all electric service required for a short-term period to installations such as construction projects, fairs, displays, exhibits and similar temporary purposes.

TYPE OF SERVICE

Service under this schedule shall be single phase or three phase, 60 Hertz, alternating current at the Utilities Commission's available standard voltage. At the option of the Utilities Commission, three phase service will be provided when individual motors rated at 5.0 horsepower or larger are connected. Where more than one meter is utilized for this service, a separate "Monthly Rate" calculation will be made for each meter for billing purposes.

MONTHLY RATE

Temporary service shall be billed under the "Monthly Rate" provisions of the appropriate general service non-demand or general service demand rate schedule.

The customer shall pay, in advance, the estimated cost of installing and removing such facilities as may be required to provide such temporary service.

CHARGES FOR TEMPORARY ELECTRIC SERVICE INSTALLATION

Temporary electric service connection charges shall be as follows:

- (a) Installing and removing overhead service and meter \$300.00
- (b) Connecting and disconnecting customer to direct buried underground facilities including installation and removal of meter \$ 180.00

The charges shall pertain only to single phase, 60 Hertz, service at the available standard secondary distribution voltage. This service is available only when the Utilities Commission has existing capacity, lines, transformers, and other equipment at the requested point of delivery. The Customer's service entrance electrical cable shall not exceed 200 amperes capacity.

(Continued on Original Sheet No. 17.1)

(Continued from First Revised Sheet No. 17.0)

Temporary electric service connection charges shall be non-refundable and must be paid in advance of installation of such facilities. The cut-in charge, as established on Sheet No. 4.3, is a separate charge payable by the customer and is not a part of the temporary electric service connection charges.

The Utilities Commission will charge and collect for temporary electric energy based on the temporary service electric rates schedule in effect at the time.

If a specific temporary electric service other than that stated above is required, the Utilities Commission, at the Customer's request, will provide a cost for the facilities and install such additional electrical equipment. This cost will be a Contribution-in-Aid-of-Construction payable in advance to the Utilities Commission.

RATES SCHEDULE GSL-1

GENERAL SERVICE NON-DEMAND LOAD MANAGEMENT SERVICE
ELECTRIC RATE SCHEDULE

The Utilities Commission shall credit, charge, and collect for load management General Service Non-Demand electric service energy based on the availability, application, character of service, limitation of service, monthly rate, tax adjustment clause and special provisions.

AVAILABILITY

At any location within the Utilities Commission service area in accordance with the service policies of the Commission.

APPLICATION

This schedule is available to customers meeting the application requirements for General Service Non-Demand service. The Load Management Credit under this schedule is applicable to General Service Non-Demand customers using an electric heat pump as the only source of electric heating and cooling.

MONTHLY LOAD MANAGEMENT CREDIT

<u>Interruptible Equipment</u>	<u>Monthly Credit</u>
Electric Heat Pump	\$5.00

CONDITIONS OF INTERRUPTION

The Commission may interrupt electric service to the above equipment, during the Peak Period, with a frequency and duration designed to minimize both the system demand and any inconvenience to load management customers. The current interruption policy, subject to change, may be obtained from the Commission.

PEAK PERIOD

For the months of November through April, the Peak Period is the prevailing clock time between 6:00 A.M. and 11:00 A.M. and 6:00 P.M. and 11:00 P.M.

For the months of May through October, the Peak Period is the prevailing clock time between 12:00 noon and 11:00 P.M.

SPECIAL PROVISIONS

Service under this rider is subject to the following special provisions:

1. The Utilities Commission shall be allowed reasonable access to the customer's premises to install, maintain, inspect, test, and remove load management devices on the electrical equipment specified above.

(Continued on Second Revised Sheet No. 18.1)

(Continued from Second Revised Sheet No. 18.0)

2. Prior to the installation of load management devices, the Utilities Commission may inspect the customer's electrical equipment to ensure good repair and working condition, but the Utilities Commission shall not be responsible for the repair or maintenance of the electrical equipment.
3. The Utilities Commission shall not be required to install load management devices on electrical equipment which would not be economically justified for reasons such as excessive installation costs, oversized heating or cooling equipment, or abnormal utilization of equipment, including infrequent utilization of equipment subject to load control.
4. Multiple units of any electrical equipment specified above must all be installed with load management devices to qualify for the credit attributable to that equipment.
5. Billing under this rate schedule will commence with the first complete billing period following installation of the load management device.
6. In the event any customer elects to discontinue service under load management and has not received service under this rate schedule for a minimum of three complete billing periods during the applicable corresponding heating or cooling seasons, then the Utilities Commission shall bill such customer for all prior load management credits received by the customer for such corresponding service over a period not in excess of seven months.
7. The limitations on equipment interruptions shall not apply during capacity emergencies on the Utilities Commission's system.

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

TERMS OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0 of Resolution No. 12-83.

RATE SCHEDULE TAC-90
TAX ADJUSTMENT CLAUSE

APPLICATION

The Tax Adjustment Clause is applicable to and becomes a part of all the Utilities Commission retail electric rate schedules.

BILLING

The monthly statement for electric service will include, at the discretion of the Utilities Commission, any applicable taxes as a separate item on the customer's bill in addition to charges for electric service under the applicable rate schedule. Taxes are defined as any taxes, assessments, levies, charges, or surcharges which are levied or assessed by any government or governmental agency.

**CONVERSION OF ELECTRIC DISTRIBUTION SYSTEMS
FROM OVERHEAD TO UNDERGROUND RATE SCHEDULE**

Conversion of Existing Residential Overhead Services - Conversion of existing services shall be at the customer's expense. Conduit installation to the Utilities Commission and local code authority requirements and the actual conversion of the owner's meter base and associated wiring is the responsibility of the customer at his expense. At the customer's request, Utilities Commission will furnish and install the underground service lateral to the line side terminals of the meter base at the customer's expense

Conversion of Existing Primary and Secondary Overhead Facilities – Conversion of existing overhead primary and secondary facilities shall be at the customer's expense.

APPLICATION

This option is available to residential subdivision and commercial customers within the electric service area of the Utilities Commission, City of New Smyrna Beach. Each conversion shall be reviewed for feasibility based on prudent engineering standards. Determination and feasibility will be made by the Utilities Commission's Engineering Department.

DEFINITIONS

Residential Subdivisions: a tract of land which is divided into five or more building lots, and which is zoned residential.

Commercial Customer (non-residential): Service to customers engaged in selling, warehousing, or distributing a commodity, in a service activity or profession, or in some form of economically gainful or social activity (offices, stores, clubs, hotels, schools, etc.).

CONTRIBUTION IN AID OF CONSTRUCTION

Contribution-in-aid-of-construction for 100% of the cost of conversion shall be paid upfront by the applicant(s).

APPLICATION

Application for Overhead to Underground Conversion shall be made in writing to the Utilities Commission Engineering Department.

For single customer applications, the Utilities Commission Engineering Department will create a binding, detailed engineering estimate for the applicant. Said estimate will be binding for three months.

(Continued on Second Revised Sheet No. 23.1)

(Continued from Second Revised Sheet No. 23.0)

For applications impacting more than one customer/property owner, the applicant shall provide the Utilities Commission an application with 100% of the requesting customer's signatures. Upon receipt of the application, the Utilities Commission Engineering Department will then perform a binding, detailed engineering estimate for the applicant. Said estimate will be binding for three months.

ELECTRIC FACILITIES

Electric facilities to be placed underground shall consist of primary cable, transformers, pedestals, service cables and other related equipment from the established location for undergrounding to the customer's meter box. Customer is responsible for the installation of the meter box by a licensed professional.

JOINT USE POLES

The Utilities Commission will facilitate the removal of services from other providers (i.e., telecom, cable, etc.) but is not responsible for the cost of said removal. Costs to remove or relocate other providers facilities shall be paid by the Customer.

REMOVAL OF OVERHEAD FACILITIES:

The Utilities Commission will remove overhead facilities, including the pole, after joint pole users have removed their facilities.

STREETLIGHTS

The Utilities Commission will remove existing streetlights.

Installation of new streetlights and private outdoor lighting will be in accordance with the Public Street Lighting and Private Outdoor Lighting Electric Service Rate Schedule.

TERMS OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

RATE SCHEDULE GSLD-1

GENERAL SERVICE - LARGE DEMAND ELECTRIC RATE SCHEDULE

The Utilities Commission shall charge and collect for general service demand electric energy on the basis of availability, application, type of service, monthly rate, minimum charge, determination of billing demand, power factor adjustment, primary service discount, tax adjustment clause, and fuel and purchased power cost adjustment clause.

AVAILABILITY

At any location within the Utilities Commission service area in accordance with Commission service policies to non-residential customers with an annual measured peak demand of 250 kW or more.

APPLICATION

To non-residential customers for all electric power and energy requirements. Each premises will be supplied at one point of delivery and all electric service will be supplied through one meter.

TYPE OF SERVICE

Single or three phase, 60 hertz, at one of the Commission's standard service voltages.

MONTHLY RATE

Customer Charge	\$45.00
Demand Charge	\$ 8.00 per kW of billing demand
Energy Charge	7.177¢ per kWh

The minimum charge is the customer charge plus the demand charge.

DETERMINATION OF BILLING DEMAND

The Billing Demand shall be the greater of: (1) the Measured Demand, for the current month, adjusted for power factor, if applicable; (2) 250 kW; and (3) eighty (80) percent of the maximum Measured Demand, power factor adjusted, recorded during the preceding eleven (11) months.

(Continued on First Revised Sheet No. 25.1)

(Continued from First Revised Sheet No. 25.0)

POWER FACTOR ADJUSTMENT

The Utilities Commission may, at its option, install metering equipment to allow the determination of the reactive components of power utilized by the customer. The customer's utilization of equipment shall not result in a power factor at the point of delivery of less than 85 percent lagging at the time of Measured Demand. Should the power factor be less than 85 percent lagging during any month, the Utilities Commission may adjust the Measured Demand by 85 percent and by dividing the result by the power factor actually established at the time of the Measured Demand during the current month. Such adjusted Measured Demand shall be used in determining the Billing Demand.

FUEL AND PURCHASED POWER COST ADJUSTMENT

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

TAX ADJUSTMENT CLAUSE

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

TERMS OF PAYMENT

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

(Standby Electric and On-Site Generation) SE/OSG
INTERIM NET METERING RIDER TO
UC RESIDENTIAL AND GENERAL SERVICE SCHEDULES
EXCLUDING ALL LOAD MANAGEMENT SCHEDULES

I. AVAILABILITY:

Throughout the Utilities Commission, City of New Smyrna Beach, Florida (UC), service area from existing lines of adequate capacity. Service under this Rider is provided on a customer-by-customer basis and subject to the completion of arrangements necessary for implementation.

This Rider may be modified or withdrawn and is classified by the Utilities Commission as a Non-Firm Electric On-Site Customer-Owned Generation Service Net Metering Rider to existing UC Residential and General Service Schedules excluding all Load Management schedules which Schedules may be amended from time to time. For purposes of affording electric supply options to native load customers, the participating customers agree that the Terms and Conditions Provisions or any other Commission determination regarding this Rider shall not be construed: as an obligation to serve; incur direct or imputed liability for persons, business processes, or tangible or intangible assets; or incur direct or indirect costs upon the UC system for having offered said Rider to participating customers.

The UC shall have the and reserves the right to reject any project from this Rider Classification upon any appropriate grounds, including, without limitation, a demonstration that the customer has installed OSG with a total nameplate rating greater than ninety percent (90%) of its demand; or has operated or may operate the SE/OSG in a material manner detrimental to the operation of the UC's electrical system; or has or may establish events whereby the UC is non-compliant with UC Res. 28-78 and NSB Charter.

A. Renewable Customer-owned Energy Power Producing Facilities

For retail customers with renewable energy generating systems* delivering kilowatt hours onto the UC system consisting of:

1. Tier One. Ten (10) kilowatts or less provided they comply with the then in effect UC Standardized Interconnection Requirements and do not exceed ninety (90) percent of the customer's maximum potential alternating current demand served by all sources. UC fees for such installations will be consistent with fees for other customers without such generation, including application fees. However, compensation for energy delivered onto the UC system shall exclude the Charter required six (6) percent payment to the City of New Smyrna Beach and the required eight (8) percent UC Resolution 28-78 R&R assessment from the applicable rate.
2. Tier Two. Over ten (10) kilowatts and less than or equal to one-hundred (100) kilowatts provided they comply with the then in effect UC Standardized Interconnection Requirements for units of such size and do not exceed ninety (90) percent of the customer's maximum potential alternating current demand served by all sources. UC fees for such installations will be cost-based for the specific installation, including application fees. However, compensation for energy delivered onto the UC system shall exclude the Charter required six (6) percent payment to the City of New Smyrna Beach, the required eight (8) percent UC Resolution 28-78 R&R assessment from the applicable rate, and the applicable Transmission system cost and generation capacity cost in effect during the billing cycle for payments earned under this tariff.

(Continued on First Revised Sheet No. 26.1)

(Continued from First Revised Sheet No. 26.0)

(Standby Electric and On-Site Generation) SE/OSG (Cont.)
INTERIM NET METERING RIDER TO
UC RESIDENTIAL AND GENERAL SERVICE SCHEDULES
EXCLUDING ALL LOAD MANAGEMENT SCHEDULES

3. Tier Three. Greater than one hundred (100) kilowatts and less than or equal to two thousand (2,000) kilowatts provided they comply with the then in effect UC Standardized Interconnection Requirements for units of such size and do not exceed ninety (90) percent of the customer's maximum potential alternating current demand served by all sources. UC fees for such installations will be cost-based for the specific installation, including application fees. However, compensation for energy delivered onto the UC system shall exclude the Charter required six (6) percent payment to the City of New Smyrna Beach, the required eight (8) percent UC Resolution 28-78 R&R assessment from the applicable rate, the applicable embedded fuel costs in effect during the billing cycle, and the applicable transmission and ancillary transmission costs and generation capacity cost in effect during the billing cycle for payments earned under this tariff.
4. If the kWh delivered to the UC System exceeds the kWh delivered to the Customer's home in a billing cycle, a credit for the net kWh delivered to the UC's system shall be carried forward to the next billing cycle. Credits may accumulate and be carried forward for a 12 month period. The 12month period is defined as the first billing cycle in which the installation has been approved by the UC for interconnection and will continue for each successive month concluding with the 12th billing cycle ("reconciliation month"). At the conclusion of the 12th billing cycle the net balance will be paid the Customer for net excess energy delivered to the UC's System at the end of the 12 month period based upon UC costs in effect during said month of the 12th billing. Such payment will be forthcoming within 60 days of such reconciliation date. The 12 month reconciliation cycle will be repeated until such agreement is terminated by either party at which time the UC costs for that month will be used to determine any payments, if any, which will be forthcoming within 60 days of such reconciliation date.
 - * The designated technologies of fuel cell, wind, solar-thermal, solar-voltaic, sustainably-managed biomass, vegetable-base oil, tidal, geothermal, methane waste, waste-to-energy, or fuel-cell combined heat and power (CHP) systems are currently regarded as renewable sources.

B. Green Attributes

The UC shall install, at UC's sole expense, metering equipment capable of measuring the total system output of interconnected customer-owned renewable generation. The customer shall install the appropriate meter socket and associated electrical circuits as may be required for the customer's renewable generation. The UC shall have the right to receive, and is solely responsible to apply and qualify for, the benefits of any and all Green Attributes created or granted as a result the total system output of interconnected customer-owned renewable generation. The term "Green Attributes" shall include any and all credits, certificates, benefits, environmental attributes, emissions reductions, offsets, and allowances, however entitled, attributable to the generation of electricity from the customer owned-renewable generation and its displacement of conventional energy generation.

(Continued from First Revised Sheet No. 26.1)

(Standby Electric and On-Site Generation) SE/OSG
INTERIM NET METERING RIDER TO
UC RESIDENTIAL AND GENERAL SERVICE SCHEDULES
EXCLUDING ALL LOAD MANAGEMENT SCHEDULES (Cont.)

II. APPLICATION FOR SERVICE:

The Customer must apply for service by providing the Company with an executed Application for Interconnection and an executed Interconnection Agreement, all of which are available from UC engineering. UC staff is hereby authorized to amend technical requirements, including the designated renewable technologies, of said Application and Interconnection Agreement as may be appropriate from time-to-time based upon the individual circumstances or applications onto the UC's electric system.

No application fee shall apply for Tier One Customers.

Tier Two Customers shall pay a \$275 application fee to cover the cost for processing the application and review of the proposed interconnection impact on the UC's electric system. Such Interconnection shall be consistent with prudent utility practice, industry criteria, and shall not whatsoever require any costs, including overheads and indirects, to the UC for upgrade or construction on the UC's electric system.

Tier Three Customers shall pay a \$750 application fee to cover the cost for processing the application and review of the proposed interconnection impact on the UC's electric system, plus the actual UC cost of a formal Interconnection Study. Such Interconnection shall be consistent with prudent utility practice, industry criteria, and shall not whatsoever require any costs, including overheads and indirects, to the UC for upgrade or construction on the UC's electric system.

III. CHARACTER OF SERVICE:

Continuous, 60 cycle single or three phase alternating current delivered at one standard offering secondary or primary distribution voltage or transmission voltage, phase and voltage depending on availability and the customer's requirements. Under these demand provisions, the customer agrees to maintain power factors at .98 or greater but not to exceed 1.02 of unity.

IV. INTERCONNECTION:

A. TERM

A minimum of one year from commencement of service under this Rider and for such additional time as the customer continues to qualify for said service on a month-to-month basis unless terminated by the customer of the UC. The UC may remove a customer not meeting the criteria for mandatory or elective service at any time. A customer cannot resume said service except on a case-by-case basis as determined solely by the UC.

B. GENERAL TERMS AND CONDITIONS

1. The charges calculated under this tariff are subject to change in such an amount as may be approved and/or amended by the Utilities Commission or under the provisions of applicable tariffs and riders.

(Continued on First Revised Sheet No. 26.3)

(Continued from First Revised Sheet No. 26.2)

(Standby Electric and On-Site Generation) SE/OSG
INTERIM NET METERING RIDER TO
UC RESIDENTIAL AND GENERAL SERVICE SCHEDULES
EXCLUDING ALL LOAD MANAGEMENT SCHEDULES (Cont.)

- a. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interaction operation with an electric distribution system in compliance with the applicable **Codes and Standards**. The Customer shall conform to all applicable codes and standards for safe and reliable operation. Among these are the National Electric Code (NEC), National Electric Safety Code (NESC), the Institute of Electrical and Electronics Engineers (IEEE), American National Standards Institute (ANSI), and Underwriters Laboratories (UL) standards, and local, state and federal building codes. The Customer shall be responsible to obtain all applicable permit(s) for the equipment installations on their property.
 - b. Codes and standards for inverter installations will be in compliance with all applicable standards including of IEEE 1547, IEEE 1547a, IEEE 1547.1, and UL 1741IEEE Standard 519-1992 Harmonic Limits.
 - c. **Non-Inverter-Based Interconnection Requirements**
In addition to applicable inverter codes and standard, the Application for such Interconnection may require more detailed UC review, testing, and approval, at Customer cost, of the equipment proposed to be installed to ensure compliance with other additional and applicable standards including:
 - IEEE Standard 1547-2003 Standard for Interconnecting Distributed Resources with Electric Power Systems
 - ANSI Standard C37.90-2005, IEEE Standard for Relays and Relay Systems Associated with Electric Power Apparatus
 - d. Customers proposing such interconnection may also be required to submit a power factor mitigation plan for UC review and approval.
 - e. The Customer shall provide a written report that Customer-owned renewable generation complies with the foregoing standards.
2. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to No. 1 immediately above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid or circuit should the grid or circuit lose power or become de-energized. For Tiers Two and Three installations of additional requirements such as protective and isolation relaying and synchronous generation relays may be required by UC Engineering and will be reviewed on a case-by-case basis.

3. The Customer shall be responsible for protecting its Customer-owned renewable generation equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the UC electrical system in delivering and restoring power; and shall be responsible for ensuring that Customer-owned renewable generation equipment is inspected, maintained, and tested with the manufacturer's instructions to ensure that it is operating correctly and safely. The Customer agrees to provide and maintain general liability insurance for personal and property damage, or sufficient guarantee and proof of self-insurance of not less than one hundred thousand dollars (\$100,000) for Tier One inverter-based solar photovoltaic (PV) systems, one million dollars (\$1,000,000) for all other Tier One, one and one-half million dollars (\$1,500,000) for Tier Two, and two million dollars (\$2,000,000) for Tier Three during the entire period of the Interconnection Agreement.
4. The Customer agrees to provide City of New Smyrna Beach Building Code Official inspection and certification of the installation. The certification shall reflect that the Official has inspected and certified that the installation was permitted, has been approved, and has met all National Electric Code electric and ASME mechanical qualifications as applicable.
5. The UC reserves the right to inspect Interconnection , but not be limited to, such generating facilities, pertinent equipment, and instructions, to insure compliance with its Interconnection Agreement, upon reasonable notice or without notice in the event of an emergency or hazardous condition. Such inspection or observation by the UC shall not be deemed to be or construed in any way whatsoever as a direct or implied warranty by the UC of the safety, durability, suitability, or reliability of such equipment. The UC further reserves the right to disconnect the Customer-owned renewable generation at any time. The UC shall require the Customer to install, at the Customer's expense, a lockable, manual disconnect switch of the visible load-break type separate from, but adjacent to the meter socket(s) for UC meters, to provide a separation point between the AC power output of the Customer-owned renewable generation and any Customer wiring connected to the UC's system.
6. The Customer shall be solely responsible to disconnect the Customer-owned renewable generation and the Customer's other equipment if conditions on the UC system could adversely affect the Customer-owned renewable generation.
7. No interconnection of such renewable Customer-owned generation is permissible until approved by the UC by written acceptance. Such Interconnection Agreement is not assignable without written 30 day notice and agreement by either Party which consent shall not be unreasonably withheld or delayed. Furthermore, the Customer shall not enter into any lease agreement that results directly or indirectly in the retail purchase of electricity nor the retail sale, directly or indirectly, of electricity from the Customer-owned renewable generation.
8. The Customer shall notify the UC of any anticipated modifications to said system 30 days in advance of such proposed changes through a new application specifying such equipment changes or new equipment and will require written approval by the UC and the City of New Smyrna Beach or Volusia County Building Inspection Department.

(Standby Electric and On-Site Generation) SE/OSG
INTERIM NET METERING RIDER TO
UC RESIDENTIAL AND GENERAL SERVICE SCHEDULES
EXCLUDING ALL LOAD MANAGEMENT SCHEDULES (Cont.)

9. The Customer shall indemnify, hold harmless and defend the UC from and against any and all liability, proceeding, suits, cost or expense for loss, damage or injury to persons or property, including the Customer-owned renewable generation, in any manner directly or indirectly connected with, or growing out of operation of the Customer-owned renewable generation, except in those cases where loss occurs due to the negligent actions of the UC as may be determined by Florida law. Under the limits permissible by Florida municipal law, the UC shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the UC's system, except when the loss occurs due to the negligent actions of the Customer.

C. INCREASE IN RATES AND CHARGES

All rates and charges billed under a Service Classification and Its Rider, including the Minimum Charge, shall be increased pursuant to the applicable required tax rates and other applicable governmental required fee payments by the United States, the State of Florida, Volusia County, the Utilities Commission, the City of New Smyrna Beach, the City of Edgewater or another applicable tax jurisdiction, as appropriate, for wherein the customer takes service.

RATES, CHARGES AND FEES

CAPITAL CONNECTION FEE CHARGES - POTABLE WATER

The Potable Water Capital Connection Fee charge is established based on meter size and number of meters requested. The Capital Connection Fee charge per meter size for Potable Water is as listed in the TABLE below:

TABLE – POTABLE WATER

<u>Meter Size (inch)</u>	<u>Capital Connection Fee (\$)</u>
5/8"	\$1,485
1"	\$3,713
1-1/2"	\$7,425
2"	\$11,880
3"	\$22,275
4"	\$37,125
6"	\$74,250
8"	\$118,800
10"	\$170,775
12"	\$319,275

Notes:

1. For Commercial projects:
 - a. The meter size (and accompanying backflow device) must match the size of supply plumbing to the building.
 - b. The applicant must provide signed and sealed plumbing plans prior to acceptance of capital connection fees for review by The Utilities Commission Engineering Department.
 - c. The Utilities Commission Engineering Department may accept “a meter size” smaller than the proposed plumbing, provided signed and sealed engineering calculations by a MEP Engineer are provided for review and acceptance. (For Example: a 4” plumbing size would have an opportunity provided by calculation by landowner/developer for a 3” meter, but no smaller.)
 - d. Meter and backflow devices must be same size.
 - e. Master meters are only permitted for buildings three stories or more and/or or as determined feasible by the Utility Commission Engineering Department. System pressure diminishes above the 2nd floor. Special equipment (by developer/owner) may be required for floors 3 and above.

EFFECTIVE: June 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CAPITAL CONNECTION FEE CHARGES - POTABLE WATER (Cont.)

Notes: (Cont.)

2. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
3. The fees listed above are priced on a per meter basis⁴. The fees will not be applied to existing meters.
5. Fees will only apply to each new meter whether residential, commercial, industrial, common area, expansion, upsizing, etc.
6. A credit will be given for the existing meter when that meter is replaced with a larger meter.
7. The Capital Connection Fee does not include other fees.

EFFECTIVE: June 1, 2021

RATES, CHARGES AND FEES

CAPITAL CONNECTION FEE CHARGES - IRRIGATION WATER

The Irrigation Water Capital Connection Fee charge is established based on meter size and number of meters requested. The Capital Connection Fee charge per meter size for Irrigation water is as listed in the TABLE below:

TABLE – IRRIGATION WATER

<u>Meter Size (inch)</u>	<u>Capital Connection Fee (\$)</u>
5/8"	\$2,970
1"	\$7,425
1-1/2"	\$14,850
2"	\$23,760
3"	\$44,550
4"	\$74,250
6"	\$148,500
8"	\$237,600
10"	\$341,550
12"	\$638,550

Notes:

1. Irrigation meters are used primarily for irrigation purposes and are generally the second meter for an account.
2. An independent Irrigation meter is possible without a Potable Water meter.
3. Irrigation meters can also be used to serve common areas in both residential and/or commercial developments, respectively.
4. There are no Wastewater connections associated with an irrigation meter.
5. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
6. The fees listed above are priced on a per meter basis.
7. The fees will not be applied to existing meters.
8. Fees will only apply to each new meter whether residential, commercial, industrial, common area, expansion, upsizing, etc.
9. A credit will be given for the existing meter when that meter is replaced with a larger meter.
10. The Capital Connection Fee does not include other fees.

EFFECTIVE: June 1, 2021

RATES, CHARGES AND FEES

CAPITAL CONNECTION FEE CHARGES - WASTEWATER

The Wastewater Capital Connection Fee charge is established based on meter size and number of meters requested. The Capital Connection Fee charge per meter size for Wastewater is as listed in the TABLE below:

TABLE – WASTEWATER

<u>Potable Water Meter Size (inch)</u>	<u>Capital Connection Fee (\$)</u>
5/8"	\$1,445
1"	\$3,613
1-1/2"	\$7,225
2"	\$11,560
3"	\$21,675
4"	\$36,125
6"	\$72,250
8"	\$115,600
10"	\$166,175
12"	\$310,675

Notes:

1. Regardless of the Potable water meter size and corresponding Wastewater Capital Connection Fee, the smallest residential Wastewater connection (lateral) shall be four (4) inches.
2. Regardless of the Potable water meter size and the corresponding Wastewater Capital Connection Fee, the smallest commercial Wastewater connection (lateral) shall be six (6) inches.
3. The Wastewater Capital Connection Fee shall be based on the Potable water meter size service for the proposed unit. (Unit refers to single residential home, separate commercial services, including lease and purchase space, etc.)
4. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
5. The fees listed above are priced on a per meter basis.
6. The fees will not be applied to existing Wastewater connections.
7. Fees will only apply to each new Wastewater connection, whether residential, commercial, industrial, common area, expansion, upsizing, etc.
8. A credit will be given for the existing meter when that meter is replaced with a larger meter.
9. The Capital Connection Fee does not include other fees.

EFFECTIVE: June 1, 2021

RATES, CHARGES AND FEES

CAPITAL CONNECTION FEE CHARGES - RECLAIMED WATER

The Reclaimed Water Capital Connection Fee charge is established based on meter size and number of meters requested. The Capital Connection Fee charge per meter size for Reclaimed Water is as listed on the TABLE below:

TABLE – RECLAIMED WATER

<u>Meter Size (inch)</u>	<u>Capital Connection Fee (\$)</u>
3/4"	\$635
1"	\$1,058
1-1/2"	\$2,117
2"	\$3,387
3"	\$6,350
4"	\$10,583
6"	\$21,167
8"	\$33,867
10"	\$48,683
12"	\$91,017

Notes:

1. The Reclaimed Water Capital Connection Fee shall be based on the Reclaimed Water meter size serving the proposed unit. (Unit refers to single residential home, separate commercial services, including lease and purchase space.)
2. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
3. The fees listed above are priced on a per meter basis.
4. The fees will not be applied to existing Reclaimed Water meters.
5. Fees will only apply to each new Reclaimed Water connection, whether residential, commercial, industrial, common area, expansion, upsizing, etc.
6. A credit will be given for the existing meter when that meter is replaced with a larger meter.
7. The Capital Connection Fee does not include other fees.

EFFECTIVE: June 1, 2021

RATES, CHARGES AND FEES

CAPITAL CONNECTION FEE CHARGES - NOTES

1. A 5/8" potable water meter will be considered one Equivalent Residential Unit (ERU) which represents a nominal usage (or level of service) of 200 gallons per day for potable water, as determined by utilizing historical customer account records and water sales for the Utilities Commission's system.
2. A 3/4" reclaimed meter will be considered one Equivalent Residential Unit (ERU) which represents a nominal usage (or level of service) of 500 gallons per day for reclaimed water, as determined by utilizing historical customer account records and water sales for the Utilities Commission's system.
3. A 5/8" irrigation water meter will be considered one Equivalent Residential Unit (ERU) which represents a nominal usage (or level of service) of 400 gallons per day for potable water, as determined by utilizing historical customer account records and water sales for the Utilities Commission's system.
4. The aforementioned capital connection fee charges constitute potable water, irrigation water, wastewater and reclaimed water capital connection fee charges only and such charges shall be paid before any connection will be made, and only upon determination by the Utilities Commission that existing water facilities are available to which the connection is made.
5. Payment of the capital connection fee charges must be made to the Utilities Commission, City of New Smyrna Beach, Florida, in advance of issuance of building permits within our service area.
6. The aforementioned charges as detailed above apply to all applications for service approved subsequent to the effective date of Resolution No. 2021-01 and because capital connection fee charges cannot be held in abeyance indefinitely, the application for water, wastewater, irrigation water and reclaimed water service shall be restricted to be in effect ninety (90) days or as long as the original building permit is valid, whichever is longer. In the event the service connection has not been made prior to the aforementioned restriction, water, wastewater, irrigation water and reclaimed water capital connection fee charges will be subject to revision to the successor fee schedule.

EFFECTIVE: June 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

**FINANCING – CAPITAL CONNECTION FEES, METER SETTING FEES,
TAP-IN FEES AND CUT-IN FEES**

Upon certification by the Commission's Engineering Department that the service connection has not been made for the specific application for service and the applicant has withdrawn the application for service (in writing), the Water, Irrigation Water, Wastewater and Reclaimed Water Capital Connection Fee charges that have been paid will be subject to refund without interest.

Such Water, Irrigation Water, Wastewater and Reclaimed Water Capital Connection Fee charges are in addition to meter setting installation charges, line extension contributions, or other charges and fees as may be appropriate for services rendered.

Financing of payment of Water, Irrigation Water, Wastewater and Reclaimed Water Capital Connection Fees, meter setting charges, tap-in fees and cut-in charges will be available pursuant to the terms and conditions listed below:

1. Financing is made available to all individual residential customer applicants.
2. A 12-month or 24-month financing period will be utilized.
3. An annual interest rate of 2% above prime shall be used.
4. The customer must execute an agreement which states the utilities applicable (Water, Irrigation Water, Wastewater and/or Reclaimed Water) will be terminated if the customer is in default of payments. All payments previously made are non-refundable.
5. All payments must be accelerated and are due in full prior to transfer of ownership of the property.
6. A non-refundable administrative fee of \$50.00 must be paid at the time of application in order to reimburse the Utilities Commission, City of New Smyrna Beach, for services required to administer the records and financing process.

RATES, CHARGES AND FEES

CHARGES FOR WATER METER SETTING INSTALLATIONS

Connection facilities for Water service will be installed by the Utilities Commission, the cost of which is to be paid from the Water Setting Installation Charge set out herein, which will include pipe from the water main to the property line, fittings and other material related to a normal connection and a water meter, whenever the applicant shall have paid therefore the required deposit for the water service, line extension contributions, water connection fee charges, or other charges and fees as may be appropriate for service rendered. The Water Meter Setting Installation Charges shall be as follows:

<u>Water Meter Size (Inches)</u>	<u>Water Setting Installation Charge</u>	<u>Supplemental Meter Setting Installation Charge</u>
5/8"	\$ 400	\$ 300
1"	\$ 450	\$ 350
1-1/2"	\$ 850	\$ 750
2"	\$ 950	\$ 850
3"	\$6,000	\$5,400
4"	\$7,000	\$6,350

All Water Meter Setting Installation Charges of 1-1/2" or larger that require a street crossing or long service (long side service) will be determined by the Utilities Commission's Engineering Department and based on the recovery of cost of such installation. Water Meter Setting Installation Charges for all connections over 4" will be determined by the Utilities Commission's Engineering Department and based on the recovery cost of such installation.

To qualify as a supplemental meter setting, meters shall meet all the following conditions:

1. The customer shall have an existing domestic meter.
2. The supplemental meter requested is equal to or smaller than the existing domestic meter.
3. The Utilities Commission taps the existing domestic service between the meter and main, but no tap is made on the same water main.

EFFECTIVE: October 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CHARGES FOR WATER METER SETTING INSTALLATIONS (Cont.)

Residential subdivisions, with five or more building lots, that have the water main, service line to the property line, fittings and other material relating to a normal connection paid for and installed by the same person or entity and in accordance with the Utilities Commission's specifications; the applicant as herein defined shall receive a refund of **\$260.00** toward the 5/8" Water Meter Setting Installation Charge.

Should the installation not meet the minimum construction standards set by the Utilities Commission, at the time of meter installation, no refund shall be given to the applicant. The applicant is defined as the person or entity who has made actual application to the Utilities Commission for 5/8" water service and who has paid all 5/8" water meter setting installation charges.

Such Water Meter Setting Installation Charges are in addition to Water Capital Connection Fees, line extension contributions, or other charges and fees which may be appropriate for service rendered.

EFFECTIVE: October 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY

Applications for an extension of the Utilities Commission's water system shall be in writing stating the location, beginning and termination thereof, with plans and specifications in triplicate attached where such plans and specifications are required. Such written request shall be submitted to the Director of Engineering, approved by the Director of Engineering and all terms and conditions relating to said extension shall be made and executed by and between the applicant property owner and/or contractor and the Utilities Commission.

No unauthorized person, without prior written consent of the Utilities Commission, may tap any pipe or main belonging to the Utilities Commission. All unauthorized connections shall be subject to discontinuance until full payment is made for such service, including administrative costs, testing, etc.

All pipes, conduits or other component parts of service installed in or upon the premises of a customer shall conform to Utilities Commission standards of type, quality, quantity and regulations regarding installation. All on-site facilities must be maintained by the applicant according to Utilities Commission standards. Unauthorized alteration or modification of an on-site utility service interconnection may result in immediate termination of the affected service and repair or restoration at the applicant's cost.

Fire service extensions apply solely for commercial, industrial and/or multi-family customers. The Utilities Commission provides adequate fire protection facilities for typical residential service and will not pay for the increment of any oversized pipe from domestic flows to fire service flows for a commercial, industrial or multi-family installation.

Prior to Utilities Commission approval of the applicant's water service plans, the applicant must enter into a Developer's Agreement which shall be binding upon the applicant and its successors and assigns. Developer's Agreements may not be assigned to subdivision parcels and/or lots.

The Utilities Commission requires contributions-in-aid-of-construction, preferably through the installation of water transmission facilities by the applicant desiring system extension with title to such facilities being transferred to the Utilities Commission when the installation has been completed. Cash payment of water system Capital Connection Fees by the applicant represents a condition precedent to the execution of permit applications to the Department of Environmental Protection for the construction of water system extensions.

EFFECTIVE: October 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY (Cont.)

Each applicant shall be responsible for design, installation, inspection and testing of the complete water distribution system (water mains, valves, fittings, services, hydrants and all appurtenances as shown upon the approved design plans for such water distribution system) located in the street or streets adjoining or within the boundaries of the applicant's property (within the right-of-way or easement). The applicant shall be responsible for the above and shall dedicate the above at no cost to the Utilities Commission.

The design of water facilities prepared by a registered Professional Civil Engineer shall be recognized by the Utilities Commission, subject to the approval of the Director of Engineering.

As a prerequisite to the construction of any water system proposed to be connected to the Utilities Commission water distribution system, the applicant shall grant all easements and rights-of-way, without cost, as may be necessary.

The Utilities Commission's representative shall inspect all the water facilities installed which are proposed to be transferred to the Utilities Commission's ownership. In addition, the Utilities Commission's representative shall be present at all testing of the component parts of the water distribution system. The results of said testing shall be certified by the engineer of record. The Director of Engineering or their representative shall be notified three (3) days prior to testing.

Water facilities constructed prior to interconnection with the Utilities Commission's existing facilities shall be conveyed to the Utilities Commission via Bill of Sale which shall be free of all liens and encumbrances. The Utilities Commission will not accept transfer of consumer lines, plumber lines or consumers installation located on the discharge side of the water meter or on the customer side of the point of delivery of service. Said facilities will remain the maintenance responsibility of the applicant or subsequent customers. The Utilities Commission will not accept title to any component part of the water system constructed by the applicant until the Director of Engineering has approved the construction of said lines, verified the inspection of the construction and accepted the tests associated with the construction and disinfection of such facilities. The applicant must keep accurate cost records of all applicable water distribution facilities and must submit these with the Bill of Sale.

EFFECTIVE: October 1, 2021

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY (Cont.)

Residential off-site water system services in undeveloped areas include:

1. Temporary extensions less than 6-inches in diameter may be permitted on a case-by-case basis based on public necessity. No Utilities Commission participation, credits or other customer tie-ins will be allowed. Fire protection is not included, and applicant must pay all prevailing rates, fees and charges and is totally responsible for all costs associated with this extension, including looping the system which is a requirement.
2. 6-inch Water Main Extensions - The main extensions from the Utilities Commission system to the applicant's on-site facilities is required to be paid by the applicant.
3. 8-inch Diameter or Larger Water Main Extensions - If the applicant requires a 6-inch water main and oversizing is required, the Utilities Commission may, in order to promote a project also needed for other purposes, pay for the material cost of the differential between a 6-inch and the larger diameter main.

Residential off-site water system services in developed areas include:

1. The Utilities Commission shall provide three options for service for developed areas. Those options include:
 - Customer Payment
 - Area Development Agreement
 - Water Special District (Assessment, Taxing or Otherwise)
2. The Utilities Commission shall construct the extension upon collection of Capital Connection Fees and extension costs from one hundred percent (100%) of the impacted customers upon said extension. Each extension will be reviewed for feasibility based on prudent engineering standards.

The remainder of the policies for individual customers within undeveloped areas include:

1. An area development agreement would be considered the same as any other Developer's Agreement.

EFFECTIVE: October 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY (Cont.)

2. Special districts, special assessments or special taxing may be instituted within the Utilities Commission service area. These shall be considered as a development and on-site and off-site costs shall be required like any other applicant in an undeveloped area. The off-site improvements and extensions shall be handled like those for water facilities.

Commercial off-site water system services in undeveloped areas include:

1. Water main requirements, except for fire service, shall be the same as for residential service.

Commercial off-site water system services in developed areas include:

1. Water main requirements, except for fire service, shall be the same as for residential service in developed areas.

Hydraulic share for water mains is defined as follows:

1. 6" - 270 ERU's
2. 8" - 600 ERU's
3. 10" - 1,000 ERU's
4. 12" - 1,700 ERU's
5. 16" - 3,400 ERU's

Other calculations may be accepted by the Director of Engineering, if performed and properly sealed by a Florida Licensed Professional Engineer, using constants, and rates accepted by the Director of Engineering.

Utility inspection fees shall be \$50.00 per water ERU.

The Utilities Commission requires in many cases, in addition to the contribution provisions set forth herein, construction by the developer to provide for off-site extension of water necessary to connect the applicant's property with the then terminus of the water facilities adequate in size to provide service as deemed appropriate by the Director of Engineering.

Additional Infrastructure Needs - Any Utilities Commission utility infrastructure needs will be considered separately.

EFFECTIVE: October 1, 2021

WATER MAIN EXTENSION POLICY (Cont.)

Financing of payment of water extensions is available pursuant to the terms and conditions listed below:

1. Financing would be available to all individual residential customer applicants.
2. A 12-month or 24-month financing period will be utilized.
3. An annual interest rate of 2% above prime shall be used.
4. The customer must execute an agreement which states water will be terminated if the customer is in default of payments. All payments previously made are non-refundable.
5. All payments must be accelerated and due in full prior to transfer of ownership of the property.
6. A non-refundable administrative fee of \$50.00 must be paid at the time of application in order to reimburse the Utilities Commission, City of New Smyrna Beach, for services required to administer the records and financing process.

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WASTEWATER TAP-IN INSTALLATION CHARGE

The Wastewater Tap-in Installation Charge shall be applied to all Wastewater service installations if the applicant requires a separate wastewater tap-in because:

- a. No previous tap-in has been indicated by the Commission's record drawings;
- b. The applicant requested a tap-in location different from the existing tap-in location;
- c. The existing tap-in was damaged by the applicant.

Based on the criteria above, the Wastewater Tap-in Installation Charge shall be **\$350.00** for a standard installation.

If any installation is determined by the Engineering Department to require substantially more manhours, equipment, or materials, then the Wastewater Tap-in Installation Charge shall be individually calculated and assessed. It is the applicant's responsibility to expose the wastewater main for tapping and burying the main after the tap is made. It is the applicant's responsibility to obtain any required permits to perform this work.

Such Wastewater Tap-in Installation Charge is in addition to Wastewater Capital Connection Fees, line extension contributions, or other charges or fees which may be appropriate for services rendered.

RATES, CHARGES AND FEES

WASTEWATER MAIN EXTENSION POLICY

Applications for an extension of the Utilities Commission's wastewater system shall be in writing stating the location, beginning and termination thereof, with plans and specifications in triplicate attached where such plans and specifications are required. Such written request shall be submitted to the Director of Engineering, approved by the Director of Engineering and all terms and conditions relating to said extension shall be made and executed by and between the applicant property owner and/or contractor and the Utilities Commission.

No unauthorized person, without prior written consent of the Utilities Commission, may tap any pipe or main belonging to the Utilities Commission. All unauthorized connections shall be subject to discontinuance until full payment is made for such service, including administrative costs, testing, etc.

All pipes, conduits or other component parts of service installed in or upon the premises of a customer shall conform to Utilities Commission standards of type, quality, quantity and regulations regarding installation. All on-site facilities must be maintained by applicant according to Utilities Commission standards. Unauthorized alteration or modification of an on-site utility service interconnection may result in immediate termination of the affected service and repair or restoration at the applicant's cost.

Prior to Utilities Commission approval of the applicant's wastewater service plans, the applicant must enter into a Developer's Agreement which shall be binding upon the applicant and its successors and assigns. Developer's Agreements may not be assigned to subdivision parcels and/or lots.

The Utilities Commission requires contributions-in-aid-of-construction, preferably through the installation of wastewater collection facilities by the applicant desiring system extension with title to such facilities being transferred to the Utilities Commission when the installation has been completed. Cash payment of wastewater system Capital Connection Fees by the applicant represents a condition precedent to the execution of permit applications to the Department of Environmental Protection for the construction of wastewater system extensions.

Each applicant shall be responsible for design, installation, inspection and testing of the complete wastewater collection system (collection mains, laterals to the point of clean-out within the right-of-way or easement, force mains, lift or pumping stations, including the site for the same, and all appurtenances as shown upon the approved design plans for such wastewater collection system) located in the street or streets adjoining or within the boundaries of the applicant's property (within the right-of-way or easement). The applicant shall be responsible for the above and shall dedicate the above at no cost to the Utilities Commission.

EFFECTIVE: October 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WASTEWATER MAIN EXTENSION POLICY (Cont.)

The design of wastewater facilities prepared by a registered Professional Civil Engineer shall be recognized by the Utilities Commission, subject to the approval of the Director of Engineering.

As a prerequisite to the construction of any wastewater system proposed to be connected to the Utilities Commission wastewater collection system, the applicant shall grant all easements and rights-of-way, without cost, as may be necessary.

The Utilities Commission's representative shall inspect the installation of all wastewater facilities installed which are proposed to be transferred to the Utilities Commission's ownership. In addition, the Utilities Commission's representative shall be present at all testing of the component parts of the wastewater collection system. The results of said testing shall be certified by the engineer of record. The Director of Engineering or their representative shall be notified three (3) days prior to testing.

Wastewater facilities constructed prior to interconnection with the Utilities Commission's existing facilities shall be conveyed to the Utilities Commission via Bill of Sale which shall be free of all liens and encumbrances. The Utilities Commission will not accept transfer of consumer lines, plumber lines or consumers installation located on the discharge side of the water meter or on the customer side of the point of delivery of service. Said facilities will remain the maintenance responsibility of the applicant or subsequent customers. The Utilities Commission will not accept title to any component part of the wastewater system constructed by the applicant until the Director of Engineering has approved the construction of said lines, verified the inspection of the construction and accepted the tests associated with the construction and disinfection of such facilities. The applicant must keep accurate cost records of all applicable pollution control collection facilities and must submit these with the Bill of Sale.

Residential off-site wastewater collection system services in undeveloped areas include:

1. 100 GPM lift stations are the minimum size lift stations for off-site use within the Utilities Commission service area. The 100 GPM capacity is necessary for scour velocities within the 4-inch force mains from such facilities, and thereby shall be minimum.
2. Lift stations greater than 100 GPM must be paid for completely by the applicant. The Utilities Commission reserves the right to oversize the lift station paying for the incremental material cost for oversizing.

EFFECTIVE: October 1, 2021

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WASTEWATER MAIN EXTENSION POLICY (Cont.)

3. 4-inch force mains shall be paid for by the applicant from the point of connection to the Utilities Commission to the on-site facilities.
4. 6-inch force mains or larger that are extensions of Utilities Commission facilities requiring oversizing may at the Commission's discretion be paid for by the Utilities Commission.
5. For 6-inch or larger system extensions the Utilities Commission may credit some portion of the cost if it is in the Commission's interest to promote the extension of this line. The applicant is responsible for the remainder of the cost of the force main extension. The Utilities Commission reserves the right to oversize such facilities and pay for said oversizing in accordance with Utilities Commission policies.

Residential off-site water system services in developed areas include:

1. The Utilities Commission shall provide three options for service for developed areas. Those options include:
 - Customer Payment
 - Area Development Agreement
 - Water Special District (Assessment, Taxing or Otherwise)
2. The Utilities Commission shall construct the extension upon collection of capital connection fees and extension costs from one hundred percent (100%) of those customers upon said extension. Each extension will be reviewed for feasibility based on prudent engineering standards.
3. The customer shall pay the cost for all line extensions to the wastewater system. Such extensions shall be in accordance with the Commission's policies. Road and/or drainage restoration costs shall be borne by the applicant, City and/or County as applicable.

The remainder of the policies for individual customers within undeveloped areas apply.

4. An area development agreement would be considered the same as any other Developer's Agreement.

EFFECTIVE: October 1, 2021

RECLAIMED WATER RATE SCHEDULE

PRIMARY TIER RATE:

<u>Meter Size</u>	<u>Minimum Monthly Charge</u>	<u>Included Gallonage (Per KG) In Minimum Monthly Charge</u>	<u>Gallonage Charge Per KG Over Monthly Maximum</u>
3/4"	\$11.76	15 (0-15,000)	\$2.35 (15,001 and Above)
1"	\$29.40	45 (0-45,000)	\$2.35 (45,001 and Above)
1-1/2"	\$58.80	100 (0-100,000)	\$2.35 (100,001 and Above)

<u>Major Users Meter Size</u>	<u>Minimum Monthly Charge</u>	<u>Flow Charge Per KG</u>
2"	\$88.20	\$0.36
3"	\$88.20	\$0.36
4"	\$88.20	\$0.36
6"	\$88.20	\$0.36

Definitions and requirements are as follows:

1. All user services must be metered.
2. Meter sizes 3/4" to 1-1/2" will always be given the highest priority on reclaimed water availability.
3. Major users must provide a minimum of three (3) days of wet weather storage for the minimum flow rate of 1,900 gallons/acre/day on an annual average. Major users are defined as reclaimed water customers whose anticipated capacity exceeds 100,000 gallons per day (gpd) and/or requiring a 2" meter and above.

EFFECTIVE: October 1, 2021

RATES, CHARGES AND FEES

RECLAIMED WATER RATE SCHEDULE (Cont.)

SECONDARY TIER RATE

The secondary tier rate structure will apply to major users at **\$19.15/acre/month**.

Qualifications for this rate are as follows:

1. All user services must be metered.
2. Major user must provide a minimum of three (3) days of wet weather storage for the minimum flow rate of 1,900 gallons/acre/day on an annual average. Major users are defined as reclaimed water customers whose anticipated capacity exceeds 100,000 gallons per day (gpd) and/or requiring a 2" meter and above.

Restrictions for this rate are as follows:

1. The Commission will deliver reclaimed water flow to the primary tier rate users and reduce the flow to secondary tier rate users during times of limited availability of reclaimed water.
2. The user must accept the minimum flow rate stipulated under the secondary tier rate qualifications, adjusted for availability, or the account will automatically be converted to the primary tier rate schedule. The user must then meet the requirements of this level of service and may not convert back to the second-tier level of service unless approval is granted by the Commission.

RATES, CHARGES AND FEES

RECLAIMED WATER MAIN EXTENSION POLICY (Cont.)

Other calculations may be accepted by the Director of Engineering, if performed and properly sealed by a Florida Licensed Professional Engineer, using constants, and rates accepted by the Director of Engineering.

Utility inspection fees shall be **\$50.00** per reclaimed water Equivalent Residential Unit (ERU).

The Utilities Commission requires in many cases, in addition to the contribution provisions set forth herein, construction by the developer to provide for off-site extension of reclaimed water necessary to connect the applicant's property with the then terminus of the reclaimed water facilities adequate in size to provide service as deemed appropriate by the Director of Engineering.

Additional Infrastructure Needs - Any Utilities Commission utility infrastructure needs will be considered separately.

Financing of payment of reclaimed main extensions is available pursuant to the terms and conditions listed below:

1. Financing would be available to all individual residential customer applicants.
2. A 12-month or 24-month financing period shall be utilized.
3. An annual interest rate of 2% above prime shall be used.
4. The customer must execute an agreement which states water will be terminated if the customer is in default of payments. All payments previously made are non-refundable.
5. All payments must be accelerated and due in full prior to transfer of ownership of the property.
6. A non-refundable administrative fee of **\$50.00** must be paid at the time of application in order to reimburse the Utilities Commission, City of New Smyrna Beach, for services required to administer the records and financing process.

EFFECTIVE: October 1, 2021

RECLAIMED WATER IRRIGATION POLICY

Existing water customers having irrigation meters in areas where reclaimed water is available shall have one (1) year from the date of notice of availability to change their irrigation service from potable water to reclaimed water.

The Utilities Commission will not provide new irrigation water (potable) service in an area where reclaimed water service is available.

EFFECTIVE: October 1, 2021

CUSTOMER DEPOSIT

I. REQUEST FOR UTILITY SERVICES

Application for utility services may be established by telephone, on-line or in person.

II. DEPOSIT

It is the policy of the Utilities Commission, City of New Smyrna Beach, Florida, to require a deposit of all new applicants for water, wastewater, and reclaimed water services as follows:

A. Water Service

The security deposit for each water account for the various meter sizes offered is as follows:

5/8"	\$40.00
1"	\$100.00
1-1/2"	\$200.00
2"	\$500.00
3"	\$600.00
4"	\$1,000.00
6"	\$1,500.00
8"	\$2,000.00

B. Wastewater Service

The security deposit for each wastewater account for the various meter sizes offered is as follows:

5/8"	\$70.00
1"	\$150.00
1-1/2"	\$300.00
2"	\$500.00
3"	\$600.00
4"	\$1,000.00
6"	\$1,500.00
8"	\$2,000.00

In the event wastewater service only is furnished by the Utilities Commission and no water is connected to the system, the deposit for the account will be determined by the Utilities Commission prior to providing service.

EFFECTIVE: October 1, 2021

C. Reclaimed Water Service

The security deposit for each reclaimed service for the various service/meter sizes offered is as follows:

3/4"	\$20.00
1"	\$100.00
1-1/2"	\$120.00
2"	\$200.00
3"	\$300.00
4"	\$400.00
6"	\$1,000.00

III. DEPOSIT PAYMENTS

Residential Accounts

The customer will be billed for the deposit(s) and will have ten (10) days to pay said deposit(s). If the customer does not pay the deposit(s) within the ten (10) day period, utility services will automatically be disconnected.

Deposits must be made by cash, check, money order, or Utilities Commission approved aid voucher. Credit cards will be accepted up to \$1,000.00.

The following guidelines apply to all customers requesting residential water, wastewater, and reclaimed services:

- A. For existing accounts with good credit standing with the Utilities Commission at the time of adoption of this policy, their existing deposits will remain unchanged. Discontinuance of service for non-payment on existing accounts will require an additional deposit.
- B. Any new customer establishing services with the Utilities Commission will have their social security number verified by the "On-Line Utility Exchange" or any other provider of similar services. Based on the results, the customer may or may not be required to pay a deposit.

EFFECTIVE: October 1, 2021

CUSTOMER DEPOSIT (Cont.)

- C. Any current or returning customer, with at least six (6) months of history with the Utilities Commission, requesting new service will have their deposit based on current/previous account history. Customers with no more than two late fees, no disconnections for non-payment, and no returned checks, all within the most recent twenty-four (24) month period, will not be required to pay a deposit. Any returning customers not meeting these criteria will be required to pay a maximum deposit.
- D. Any customer requesting service that has a paid write-off (final bill balance sent to collections) with the Utilities Commission will be required to pay the maximum deposit prior to connection of service. If the customer has an unpaid write-off with the Utilities Commission, they will be required to pay it in full, along with the maximum deposit prior to connection of service.
- E. The Utilities Commission will not transfer a deposit from one individual to another individual. Transfers of deposit(s) from one address to another address for the same individual will be made provided the account balance at the currently served location is in a current (outstanding balance is zero) status.
- F. If a customer transfers their deposit to an account within the system, the final bill on the old account, if delinquent, will be transferred to the current account for collection and becomes subject to collections and disconnect procedures.
- G. Customers that are continuously delinquent are subject to update their deposit.

CUSTOMER DEPOSIT (Cont.)

General Service (Commercial) Accounts

- A. The customer will need to pay the full deposit at the time the account is being established.
- B. Deposit payments must be made by cash, check, or money order. Credit cards will be accepted up to \$1,000.
- C. When the required combined total deposit exceeds \$1,000, the applicant, at their option, may furnish in lieu of cash the following instruments:
 - 1. A surety bond for the full amount required;
 - OR
 - 2. An irrevocable letter of credit satisfactory to the Utilities Commission for the full amount required.

In the event the above instruments mature, the Utilities Commission reserves the right to request cash (legal tender) for the required deposit. Failure to comply with this requirement will result in discontinuance of service.

- D. For new accounts, the Utilities Commission will initiate a review of customer's monthly billings as compared to the deposit paid, not less than six months but not more than one year from the service date.

EFFECTIVE: October 1, 2021

CUSTOMER DEPOSIT (Cont.)

IV. ADDITIONAL DEPOSITS

In the event the utility service is discontinued for non-payment or has received two (2) or more returned checks within a twelve (12) month period, the Utilities Commission may require a deposit(s) sufficient to cover at least two (2) months of the previous average monthly billing to be paid within ten (10) days from notice. If such additional deposit is not made within ten (10) days, the Utilities Commission may disconnect service in accordance with the collection and disconnect policy. On a case by case basis, an extended due date for additional deposits may be considered.

V. INTEREST ON CUSTOMER POLICY

Interest rate to be determined by the Utilities Commission each year and will be credited to the customer's account each month beginning with the first full month of service.

VI. REFUNDS OF DEPOSITS

For residential accounts only, the Utilities Commission will promptly and automatically credit the deposit to the customer's account after adoption date of the policy when:

1. The customer had paid bills for the previous twenty-four (24) consecutive residential billings without having service disconnected for non-payment;

AND

2. Without having more than two (2) occasions on which a bill was delinquent for the previous twenty-four (24) months;

AND

3. When a customer has not had any returned checks within a twenty-four (24) month period (excludes verified bank errors).

The deposits are refundable only to the customer whose name appears thereon.

EFFECTIVE: October 1, 2021

VII. RECORDS OF DEPOSIT

- A. The Utilities Commission will keep records to show:
 - 1. Name, address and Social Security number of each depositor.
 - 2. Amount and date of deposit.
 - 3. Each transaction concerning deposit.
- B. The Utilities Commission will issue a receipt of deposit to each applicant from whom a deposit is received and provide a means whereby a depositor may establish claim if the receipt is lost.
- C. A record of each unclaimed deposit will be maintained, and the Utilities Commission will make a reasonable effort to return the deposit.

VIII. OTHER CHARGES

Late Charges

Utility accounts that have a past due balance of less than \$25.00 will not be assessed a late charge.

Accounts with a past due balance greater than \$25.00 will be charged \$5.00 or 1.5%, whichever is greater.

Returned Checks

If the customer pays the returned check before the check is received from the bank, the fee is \$20.00.

If the check has already been received from the bank, the fee is \$35.00.
